IDONEA

STRATEGIZE

Have you carved out the time needed to create a shared understanding of the future of the business and how its fundamentals will change? Do you have a solid understanding of what breakthroughs and new capabilities will be required? Do you have the transparency needed to drive and monitor both performance and the pace of your transformation?

Put a day aside to make sure that the Board has the necessary focus, composition, and dynamics to challenge and support Management, as well as the necessary time and metrics in its Annual Wheel to drive the initiatives that are crucial to reinventing the business.
